OBJECTIVE

Dedicated and self-taught MERN Stack Developer with a relentless passion for crafting innovative web applications. Committed to continuous learning and staying at the forefront of technology trends to deliver cutting-edge solutions that enhance user experiences and drive business success. Seeking a challenging and dynamic role where I can leverage my expertise and enthusiasm to contribute to the growth and success of a forward-thinking organization.

PROJECTS

Cavill (e-commerce website)

- Developed a robust e-commerce platform using MongoDB,Express.js, and Node.js, adhering to MVC architecture for scalability.
- Implemented user-centric features like secure authentication, responsive design, OTP verification, and an intuitive shopping cart system.
- Integrated Razor Pay for secure payments, optimized performance, and delivered a seamless user experience.
- Designed and built an efficient admin panel for streamlined product, order, and user management.
- Successfully launched and maintain the e-commerce website at cavill.tech, showcasing end-to-end project management skills.

User Management System

- Developed a user management system using MongoDB,Express.js, and Node.js, adhering to MVC architecture for scalability.
- Implemented user-centric features like secure authentication, responsive design
- Designed and built an efficient admin panel for streamlined user management.
